Experience the luxury of Hydronic Heating

GREEN EFFICIENCY

Water based hydronic heating has been the accepted form of home heating in Europe for decades and now the Australian market is realising the benefits of ultra efficient, clean, low emissions heating.

LOW RUNNING COSTS

Hydronic Heating runs on natural gas and due to it's extremely high thermal heating efficiency has much lower running costs compared to traditional gas or electric heating.

HEALTHY, ALLERGEN FREE HEAT

Unlike fan forced ducted heating or split system heating, Hydronic Heating is radiant with no airborne dust particles to irritate allergies. The sealed system is completely safe.

ZONED TEMPERATURE CONTROL

Easily control the temperature in different house zones by simply turning a knob. Whole systems can also be customised and pre-programmed through use of the control panel.

RADIANT HEAT

The beautiful warmth of natural radiant heat. Enjoy the luxury of radiant heat without the danger of exposed elements, fire or the blast of dry air.

SYSTEM INTEGRATION

Integrate other systems for add on benefits. Combo Boilers combine domestic hot water and water for heating, Solar tube collectors can be used to preheat the system and you can also connect other systems such as pool and floor heating.

World Leading European Brands

HydroHeat are Australia's leading supplier of quality hydronic heating equipment and components. The HydroHeat product range covers all facets of hydronic heating including award winning **BAXI** condensing boilers, **Henrad** designer radiators, **IMAS** towel warmers & trench heaters, **EMMETI** floor heating systems and **Giacomini** valves and accessories.

BAXI

HYDRONIC BOILERS

The boiler is the heart of a home heating system. Baxi is a leading European manufacturer with a range including the award winning BAXI Duo-Tec GA condensing boiler, amongst the most efficient in the world operating at up to 96% efficiency.

EMMETI

FLOOR HEATING SYSTEMS

Emmeti are considered leaders in the specialised field of underfloor and in slab heating systems. The robust and reliable Gerpex multi layered piping system combines with thermo-formed floor panels, manifolds and valves.

HENRAD

HYDRONIC RADIATORS

Henrad is one of the biggest Hydronic Radiator brands in Europe, producing a range of premium radiators and towel warmers with equal focus on design innovation and sustainability.

IMAS

RADIATORS & TRENCH HEATING

Italian IMAS manufacture high quality chrome plated and stainless steel towel warmers as well as trench radiators for floor installation where space is a premium.
